

SecureLock® Cables

SecureLock IEC Power Cables

Prevent accidental power cord disconnects with SecureLock - an integrated locking system of power cords and rack PDU outlets which secures power cords to Raritan rack PDUs. Raritan's PX intelligent rack power distribution units (iPDUs) are equipped with SecureLock outlets that work with standard power cords or lock when using SecureLock power cords to prevent cables from coming unplugged.

Map Your Power Chain

Use colored PDUs and power cords to match the same color as the entire power chain that supplies power to a rack.

SecureLock

Trust only genuine SecureLock equipped rack iPDUs and AC power cords; look for the SecureLock logo.

Features and Benefits

- Prevent downtime
- Easily identify power feeds
- Faster trouble shooting
- Cable types - IEC C13/C14 and IEC C19/C20
- Black, red and blue colors
- Available in varying lengths (0.5 – 3.0 meter)
- Ships coiled in packs of 6
- Rated to 105°C (221°F)
- CE certified

Power delivery is critical. Trust only genuine SecureLock power cables

Raritan rack iPDUs are equipped with SecureLock outlets that mate with any standard power cord, while positively and tightly locking to genuine SecureLock cables. Stay away from locking cables with low rated temperatures, ship kinked or are not CE certified.

Endorser of the EU Code of Conduct on Data Centre Energy Efficiency

Formulated by the EU's Joint Research Centre, the Code is a measured response to the energy challenges the EU faces. It's aim is to encourage companies with data centers to reduce energy consumption while ensuring business objectives continue to be met.

As an endorser, Raritan have pledged to implement the Code's ethos through devising products and services that help organizations to bring their data centers into line with its best practice recommendations.
